Carl,
Here is my estimate to respond to the OCFO request for supplement funding needs due to hurricane impacts to NPL sites.

Contracts - \$450k
Travel - \$25K
Overtime - \$10k

In addition, Region 6 utilized the PHILIS mobile lab to analyze samples from Superfund NPL sites to determine impacts from the hurricane. Region 6 did not incur direct charges from the use of the lab, but those costs should be captured by others.

If this is reasonable, please forward on to Crossland. Thanks.

John C Meyer
Remedial Branch Chief

Superfund Division

I know that regions are conducting activities at Superfund sites as a result of the hurricanes. This might be an opportunity to request supplemental funding. We need information by 3:00 eastern time. The information should include the activity and the estimated dollar amount. Please send your information to myself and Schatzi.

Thanks,
Ronnie

All,

Just heard from OCFO ...OMB is now looking for ballpark estimates of anticipated need in \$. Rough estimate based on the description/categories below. I know many of you do not have any solid assessment of need, but please work with regional offices to guesstimate. I recognize and have conveyed that Maria is conspiring to make this even more difficult, but for Irma and Harvey please see what

you can get. Using ballpark estimates from prior storms would be useful too.

Thanks

Jen

Subject: Hurricane Supp for OLEM

Hamilton,

As requested, here is rough outline of potential needs for a supplemental appropriation. There are high level programmatic areas with a general explanation of need and any potential concerns that would need to be addressed in the language for effective use.

Superfund: Remedial (D2)

<!--[if !supportLists]-->• <!--[endif]-->Funding would support additional investigation, remediation or monitoring of Superfund sites impacted by Harvey, Irma and possibly Maria.
<!--[if !supportLists]-->• <!--[endif]-->Potential concerns may involve state cost share and a request for a waiver of those costs may be needed to expedite work, as was done under ARRA.

RCRA: Waste Management (A1 & 99)

<!--[if !supportLists]-->• <!--[endif]-->Funding may be needed for debris management and technical assistance for the damaged/flooded hazard waste correction action facilities impacted by the storms.

RCRA: STAG (11)

<!--[if !supportLists]-->• <!--[endif]-->Funding may be need to support states in addressing the inspection and cleanup of hazardous waste facilities/corrective action sites affected by the hurricanes.

LUST: LUST Cleanup (87)

<!--[if !supportLists]-->• <!--[endif]-->LUST program may need additional funding, similar to Hurricanes Katrina/Rita and Sandy, to support states as they assess and, if needed, clean up releases at UST sites impacted by Hurricanes Harvey, Irma, and potentially, Maria.

Brownfields: STAG (79)

<!--[if !supportLists]-->• <!--[endif]-->Brownfields funding for Targeted Brownfields Assessments may be needed to assist communities with the

assessment and characterization of
contaminated or potentially contaminated
properties.
